Andrew,

I am concerned that Mark is prejudicing my rights and access to the services that the DOJ provides regarding records requests and appeals.

The OSB is not struggling to comply with my records requests. That he included my request for the retention policy in his numbers should call his accounting into question. My communications with the OSB have been civil and topical.

Unfortunately, they continue to stall, act petulantly, and conduct themselves unprofessionally.

Mark has a pending disciplinary complaint in a matter related to this request. The office of General Counsel knows very well that they should not be attempting to retaliate. For your information, the underlying matter is Mark's professional negligence regarding a tip that a local attorney sent him in February, regarding destruction of evidence by notorious and now-disbarred attorney Megan Perry.

I am happy to withdraw my petition.

Thanks,
Stephanie
